SOLUTIONS

MYOB Advanced

Tasty Fresh Foods

INTRODUCTION

Tasty Fresh Foods, a leading provider of fresh food services, faced several operational challenges due to outdated and fragmented systems. To streamline their processes, they partnered with Stratus Consulting Group to implement the MYOB Advanced solution, which integrated various functionalities including Employment Hero and Ocerra, leading to significant business improvements.

BUSINESS CHALLENGES

- **Fragmented Databases:** Each branch operated on separate databases in MYOB Exo, making consolidated reporting cumbersome and inefficient.
- **Manual Data Entry:** The reliance on manual data entry into Excel sheets increased the risk of errors and delayed financial processes.
- **Onboarding and HR Management:** The process of onboarding new staff and managing time and attendance was slow and inefficient.
- **Accounts Payable:** Manual handling of bills and invoices led to delays and inconsistencies.

OUR SOLUTION

- Database Consolidation: MYOB Advanced consolidated all branch databases into a single, integrated system, enabling seamless and efficient reporting across the organisation.
- Automation of Financial Processes: The solution automated key financial processes, reducing manual data entry and minimising errors. Generic inquiries were created to transfer data from MYOB Exo to MYOB Advanced, which was then integrated into Power BI for advanced analytics.
- Integration with Employment Hero: The Employment Hero solution was integrated to tackle HR challenges:
 - Onboarding: Streamlined onboarding process for new staff members.
 - Time and Attendance: Efficiently managed time and attendance records.
 - HR Policies and Leave Applications: Online distribution of HR policies and leave applications through the Swag app, expediting HR operations.

- **Integration with Ocerra:** Ocerra was implemented to enhance the accounts payable process:
 - Bills were pushed directly from Ocerra to MYOB Advanced.
 - Improved efficiency in handling and approving bills through an integrated workflow.
- **Enhanced Financial Operations:** MYOB Advanced offered a basic finance system with minimal customisation but effectively handled general ledger entries, sales invoices for catering, and bill processing.

RESULTS

- Improved Reporting: Consolidated databases allowed for efficient and accurate reporting.
- Increased Efficiency: Automation of financial and HR processes reduced manual workload and expedited operations.
- Enhanced HR Management: Faster onboarding and streamlined HR processes through Employment Hero.
- Optimised Accounts Payable: Automated and integrated bill processing through Ocerra, reducing delays and inconsistencies.
